

**ALL PROCEEDS FROM THE SALE OF
REUSABLE BAGS BENEFIT THE
PROGRAMS AND PROJECTS OF THE
TUSTIN COMMUNITY FOUNDATION**

a 501(c)(3) nonprofit organization #330558228

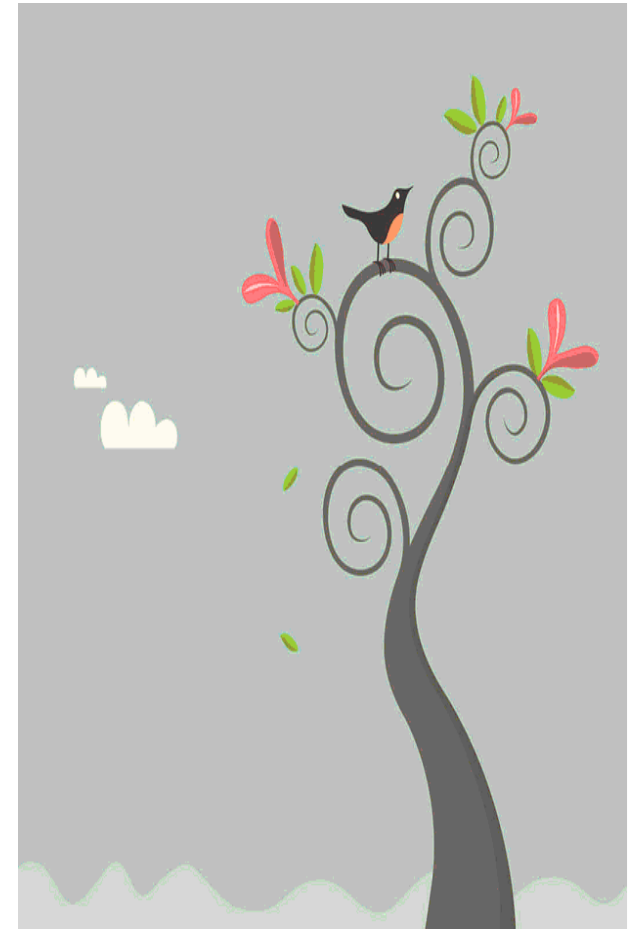

The Tustin Community Foundation:

- ✦ Supports social services, cultural and recreational programs and for the residents of greater Tustin by bringing together local and regional resources while helping to avoid duplication.
- ✦ Raises funds from a wider base of donors and distributes money back to the non-profit that they would not normally have received. During the past 3 years TCF has awarded over \$115,000 to more than 60 Tustin area nonprofit organizations and schools.
- ✦ Promotes philanthropy and volunteerism in greater Tustin as a means to engage more people and resources to raise awareness of the benefits gained when the community as a whole is involved in bolstering its cultural, recreational and social wellbeing.
- ✦ Produces special events in collaboration with the City of Tustin and other entities serving our greater community in order to raise funds and help create opportunities for cultural enrichment and community enjoyment.
- ✦ Conducts a community wide "needs assessment" every several years, in concert with local and regional organizations in order to identify current and emerging social, cultural, recreational needs within our community.
- ✦ For more information, please visit www.tustincommunityfoundation.org or call 714-393-8506.

Why Reusable Bags?

- Reusable bags save trees
- Reusable bags save water
- Reusable bags save gas and oil
- Reusable bags help end air pollution
- Reusable bags help our oceans
- Reusable bags help sea creatures
- Reusable bags are totally "in"

Paper bags are not better.

Compared to plastic, making a paper bag emits 70% more global warming gases, creates 50 times more water pollution, uses 4 times more raw materials and consumes 3.5 times more energy.

We MUST consider the impact of a bag's whole life cycle.

Littered plastic bags are an eyesore for humans and a deadly killer for wildlife and marine mammals that mistake the bags for food. Plastic bags that get buried in landfills may take up to 1,000 years to break down. The petroleum in just 14 plastic bags could drive a car a mile. Our bag habits cost us 1.6 billion gallons of oil each year.

Thank you to our sponsor, CR&R, Inc.

It's a ...

grocery and shopping bag ♣ keep in the car bag ♣ sports bag ♣ holds just about anything bag ♣ project and craft bag ♣ take it everywhere bag ♣ book or school bag ♣ go to the pool bag ♣
