Updates from Southern California Gas Company (SoCalGas®)

How to recognize and respond to a gas leak

Practicing [safety](#) means knowing what to do and taking action to protect yourself. Get the latest information about the [signs of a natural gas leak](#). Remember, a gas leak can be recognized by sight, sound or smell. And, keep in mind that natural gas can be ignited from an open flame, a lit cigarette, or anything that can cause a spark, even static electricity.

Don't turn a light switch on or off and don't operate any electronic device, power tool or vehicle, or other equipment that can cause a spark. Be aware that gas blowing from a plastic pipe may create static electricity that can ignite the gas.

If you suspect a gas leak, immediately evacuate the area, and from a safe location, call SoCalGas at **1-800-427-2200** 24 hours a day, seven days a week, or call **911**.

If you're registered for My Account and want to eliminate some of the paper piling up on your counter—[go paperless today!](#)

Or if you're not a My Account customer [register today!](#) And go paperless!

Get a **\$15 rebate on an Evolve™ ShowerStart™ Roadrunner showerhead***

As you wait for your shower water to warm up, the showerhead monitors the temperature of your water.

When the temperature reaches 95 F, the device interrupts the flow of water to just a trickle.

This will help you save water and the energy used to heat the water!

Visit our online storefront and receive your rebate during your purchase.
